3183 Omron VFD Stuck with or without E12 Error, locked in Run

Problem (public)

Unable to change any parameters, or unable to remove error code E12, or AC Drive is locked in RUN mode.
If the AC Drive is displaying error E12, or is locked in RUN mode even if nothing is connected to the Multi-function inputs, one of the Multi-function inputs is configured for a low-level signal (This problem may occur in Exercise 1-5 of the manual titled Motor Drives if parameter C001 is not reset as indicated).

Solution (public)

See fix in the attached document.
